#### *Notes for the award of scholarships from the Fisher-Waitling Fund for study abroad.*

Two scholarships are awarded each year for training in a technical subject outside India. No applications are invited for these scholarships, but Directors of Public Instruction are at liberty to submit the applications of suitable candidates before the first of January of the year in which they desire to pursue their studies in Europe. The scholarships are of the value of £300 a year for a period of three or four years according to the course of study to be pursued; free second class passages from Bombay to London and back are provided. The scholarships were originally confined to graduates of Indian universities under the age of 22 years, but it has been subsequently decided to consider also applications from non-graduates who are successful in examinations not conducted by a university, and to relax the rule by doing away with last and last rates specifying an age limit. These scholarships are not ordinarily awarded to students to study subjects in which suitable provision for training is available in India. Furthermore, only those students are considered for these scholarships who are Indian and whose fathers have rendered exceptional services and have very limited means.

Deputy Secretary to Government.

## COTTON CROP OF THE FIRST REPORT.

[On an average of the five years ending 1928-29, the area under cotton in the Madras Presidency has represented 8.2 per cent of the total area under culture in India.]

The area under cotton up to the end of July 1929 is estimated at 215,100 acres against 214,000 acres on the corresponding date of last year or an increase of about 11 per cent.

1. Central districts and South, mainly Malabar District.—The area in the South and the Central districts does not relate to new sowings, but represents the last year's crop left on the ground for second sowings before it is removed in September. It is in accordance with the promise of the Post Am. There is a slight reduction in area in these districts. The yield of the second or summer sowings is expected to be generally normal owing to the good rains obtained in May.

3. *Down or Northern and Western tracts*—The area in Kumbung and H'ary tracts covered by 25,000 acres owing to the timely clearance rendered in May and June.

4. *Clearance of Cassimide tract*—In Gambia, the area has increased by 10,000 acres owing to good season.

5. Figures by districts are given in the statement below:
